### Amendments to Claims

**Listing of Claims:** This Listing of Claims replaces all prior, and previous, versions of the claims in the application.

- 1-12. (Cancelled)
13. (Previously Presented) A capacitor, comprising:  
a first electrode comprising a plurality of electrode portions;  
a first dielectric disposed over the first electrode; and  
a second electrode formed from a metallic foil and disposed over the first dielectric,  
wherein one or more of the plurality of electrode portions are trimmed to achieve a target capacitance value.
14. (Original) The capacitor of claim 13, further comprising: a dielectric material that contacts and substantially encases the capacitor.
15. (Cancelled) ~~The capacitor of any one of claims 13 or 14 wherein one or more of the plurality of electrode portions are trimmed to achieve a target capacitance value.~~
16. (Previously Presented) A capacitor, comprising:  
a first electrode comprising a first plurality of electrode portions;  
a second electrode comprising  
a second plurality of electrode portions spaced from and interdigitated with the first plurality of electrode portions, wherein the first and second electrodes are formed from a metallic foil; and  
a dielectric disposed between the first and second pluralities of electrode portions,  
wherein one or more of the first plurality of electrode portions are trimmed to achieve a target capacitance value.
17. (Original) The capacitor of claim 16, further comprising:  
a dielectric material that contacts and substantially encases the capacitor.

18. (Cancelled) ~~The capacitor of any one of claims 16 or 17 wherein one or more of the first plurality of electrode portions are trimmed to achieve a target capacitance value.~~
19. (Previously Presented) The capacitor of any one of claims 16 and 17, wherein - the first plurality of electrode portions comprises at least four electrode portions.
20. (Cancelled)
21. (Original) A printed wiring board containing the capacitor of any one of claims 13-18.
22. (Previously Presented) The capacitor of any one of claims 13 and 14, wherein the plurality of electrode portions comprises at least four electrode portions.
23. (Previously Presented) The capacitor of Claim 13, wherein the metallic foil comprises copper.
24. (Previously Presented) The capacitor of Claim 13, further comprising a third electrode and a second dielectric disposed on the second electrode, wherein the second electrode is isolated from the first and third electrodes, and wherein the first and third electrodes are separated from the second electrode by the first and second dielectric which forms a two-layer dielectric.
25. (Previously Presented) The capacitor of Claim 16, wherein the metallic foil comprises copper.
